

Newsletter, BRAIN Study

Issue March 2020

Recruitment, final numbers

Recruitment for the BRAIN Study closed in May 2019. We are very happy to report that a total of 146 participants were assessed, three of whom participated remotely by completing and returning the questionnaires. The team are now busy analysing the data which we will share with you in due course!

We would like to thank all of our participants for the time and commitment they gave to this exciting and interesting study.

Results and press event

Results will be released soon, and we will keep in touch regarding our press event, some time in late summer 2020! This event will allow us to present and explain the results to all.

HEADING Study

Following the end of the BRAIN study, the team are now busy recruiting retired footballers to find out if there are associations between a history of concussion, heading the ball, and neurodegenerative disease.

With thanks also to:

Our Funder, The Drake Foundation:

And to our Collaborators:
