

# TIGHT K E-BULLETIN

April 2022, Issue 04

345  
PARTICIPANTS

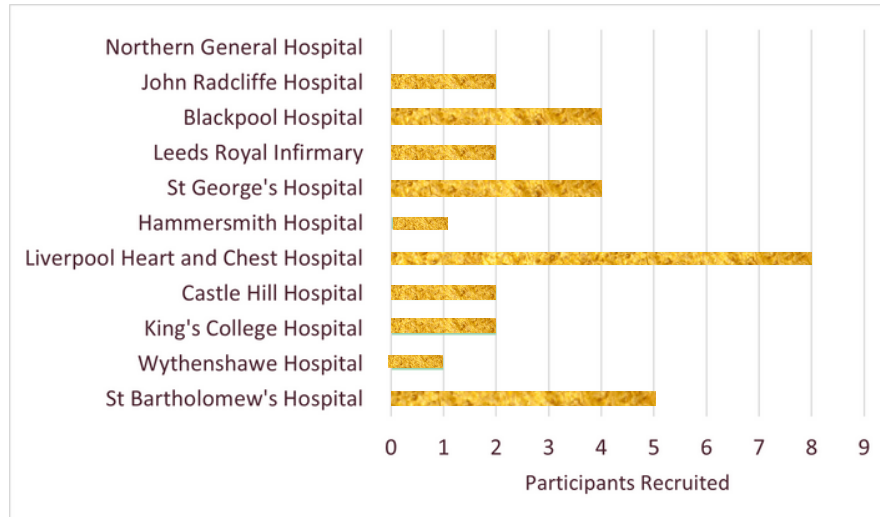

## 20% RECRUITED!

Thank you to all our sites for getting us to the 20% mark! We really appreciate all your hard work.

We need a big push now to get to the **25% milestone and beyond**. To reward your efforts, there will be a **prize** for the site that recruits the 421st participant!

### MARCH RECRUITMENT - 43 PARTICIPANTS

We are delighted to welcome on board our newest site **Freeman Hospital**. We also look forward to opening **Royal Sussex Hospital and Basildon Hospital** very soon.

*Distribution of participants recruited across sites in March 2022*

### To help us get the best match between clinically-reported AFACS and Holter-reported AFACS:

Ensure you accurately record the time the Holter monitor is **activated** on the diary card.

If the participant has an episode of AFACS that meets the primary outcome, record the time the arrhythmia **actually occurred** in the eCRF.

Store a copy of the ECG and/or rhythm strip/telemetry printout as evidence of the episode of AFACS for verification.
