PARTICIPANTS RECRUITED IN JANUARY

929
PARTICIPANTS
IN TOTAL

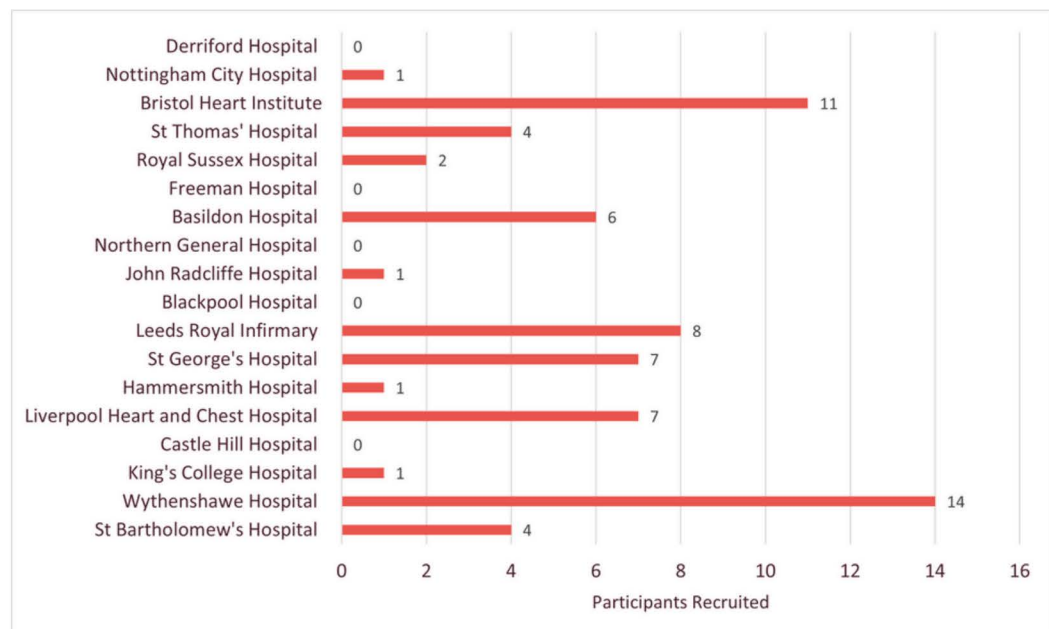

2023 is shaping up to be a good year for Tight K....

- We start the year with over 50% of our sample recruited (Total target recruitment= 1,684 participants)
- We have **THREE** new UK sites on board (Aberdeen Royal Infirmary, Nottingham and Royal Infirmary of Edinburgh) taking us to **20 open sites**
- We are expecting to open **TWO** sites in Germany this month (Deutsches Herzzentrum der Charité, Berlin and University Hospital Münster, Münster)
- And...we recruited **67 participants** in January!

MESSAGE

OF THE MONTH

We are collecting ECGs for all participants that meet the primary endpoint for verification by an independent Event Validation Committee (EVC).

Going forward, please email a copy of the ECG to the Tight K EVC Team on TightKAFACS@shtm.ac.uk. (Please use the TightK@shtm.ac.uk email for all other correspondence).

Before sending the ECG:

- Ensure the ECG is labelled clearly with the Tight K participant ID
- Permanently obscure any patient identifiable information (e.g. Name, Date of birth, address etc.)
- Permanently obscure any reference to the randomised trial treatment (e.g. Tight or Relaxed)
- Permanently obscure any reference to the name of the treating clinician and/or your site name/hospital trust

For participants already recruited, the Tight K EVC team will contact you this month with a list of participants that, based on the eCRF data have met the primary endpoint and a copy of the ECG has been stored.
