

MODULE SPECIFICATION

Academic Year (student cohort covered by specification)	2023-24
Module Code	GHM103
Module Title	Environmental Change and Global Health Policy
Module Organiser(s)	Sue Campbell
Faculty	Public Health & Policy : London School of Hygiene & Tropical Medicine
FHEQ Level	Level 7
Credit Value	CATS 15 ECTS 7.5
HECoS Code	100648 : 101317 : 101048
Mode of Delivery	Distance Learning
Mode of Study	Directed self-study, through online materials via the Virtual Learning Environment
Language of Study	English
Pre-Requisites	None
Accreditation by Professional Statutory and Regulatory Body	None
Module Cap (Maximum number of students)	None
Target Audience	This module is compulsory for the PGCert/PGDip/MSc Global Health Policy by Distance Learning, and can also be taken as a standalone module. Practitioners and researchers wishing to understand the links between health and environment/climate and the role of policy processes and actors in the quest for sustainable development.
Module Description	Environmental changes may undermine some of the scientific, technological and social progress that led to a large increase in global life expectancy observed in the 20th century. In this module, we discuss the links between human health and policies to address environmental change. Recognizing and understanding the impact of the environment on people and that of people on the environment is crucial when developing actions and health policy responses at the local and global level.

Duration	Moodle is open to access from 2nd October. Students then plan their own studies between October and June.
Last Revised (e.g. year changes approved)	April 2023

Programme(s)	Status
This module is linked to the following programme(s)	
PGCert/PGDip/MSc Global Health Policy (Distance Learning - University of London Worldwide)	Compulsory
PGDip/MSc Demography and Health (Distance Learning - University of London Worldwide)	Elective

Module Aim and Intended Learning Outcomes

Overall aim of the module
<p>The overall module aim is to:</p> <ul style="list-style-type: none"> introduce students to basic principles in environment, health and sustainable development and the importance of the interaction between them for global health policy.

Module Intended Learning Outcomes
<p>Upon successful completion of the module a student will be able to:</p> <ol style="list-style-type: none"> demonstrate the links between health, environment and sustainable development; explain equity and sustainability as central principles in environmental health; describe the different forms of risk transition and differences in the pattern of risk factors and diseases within and between countries and over time; identify the impact of environmental quality on health, including air, energy, urbanisation, and biodiversity; evaluate global environmental changes in terms of health impacts and causes; consider associated health policy responses and implications.

Indicative Syllabus

Session Content
<p>The module is expected to cover the following topics:</p> <p>Section 1</p> <p>The links between health, environment and sustainable development, and equity and sustainability as central principles in environmental change. This section introduces the concepts of:</p> <ul style="list-style-type: none"> Environment Health

Session Content

- Sustainable development
- Planetary health and global health policy

Section 2

The different forms of risk transition and the impact of environmental quality on health, including:

- How environmental quality affects health
- How human activity impacts environmental quality, focusing on key topics including energy, biodiversity, the urban environment and outdoor air pollution.

Section 3

Global environmental changes, planetary health and the context of sustainable development and global health policy implications, including:

- The challenges of sustainable development and environmental health at global, national and local levels
- The causes and impact of environmental issues
- Analysis of the associated policy considerations.

Teaching and Learning

Notional Learning Hours

Type of Learning Time	Number of Hours	Expressed as Percentage (%)
Directed self-study	72	48
Self-directed learning	28	19
Assessment, review and revision	50	33
Total	150	100

Teaching and Learning Strategy

Learning is self-directed against a detailed set of learning objectives using the materials provided. Module tutors provide asynchronous support for students by replying to students' questions in open online discussion forums and facilitating discussion. Students are also strongly encouraged to participate in live webinars available on Moodle to obtain tutor support, and to make use of LSHTM online library resources. In addition, written feedback is provided on submitted formative assignments.

Assessment

Assessment Strategy

This module has a combination of formative and summative assessments.

The formative assessment (FA) is in the form of an assignment that can be submitted only once annually. The assignment aims to help students evaluate their ability to understand and analyse links between health, the environment and sustainable development in a theoretical, empirical and policy context covering most of the intended learning outcomes of the module. The assignment is graded and a detailed feedback is provided. Please note that this grade does not count towards the student's final grade.

Formal assessment of this module consists of a time-limited assessment which will account for 100% of the student's final grade.

Summative Assessment

Assessment Type	Assessment Length (i.e. Word Count, Length of presentation in minutes)	Weighting (%)	Intended Module Learning Outcomes Tested
time-limited assessment	TBC	100	1 – 6

Formative assignments for this module can be submitted only once annually, no later than **14 February** and must be submitted via the online Assignment Management System.

Time-limited assessments for DL modules are held once a year, mostly in June (including resits).

Assessments are held in accordance with University of London's annual guidance.

Please note that a separate assessment fee may be payable in addition to the module fee. Further details will be communicated as soon as the final decisions are known.

Resitting assessment

Resits will follow the LSHTM Resits Policy, which is published at the start of each academic year. The current policy can be found here: [Resits Policy](#).

Teaching for Disabilities and Learning Differences

The LSHTM Moodle has been made accessible to the widest possible audience, using a VLE that allows for up to 300% zoom, permits navigation via keyboard and use of speech recognition software, and that allows listening through a screen reader.

For students with special needs, reasonable adjustments and support can be arranged – details and how to request support can be found on the [Inclusive Practice/Access Arrangements page](#) of the London website.
