

## MODULE SPECIFICATION

<b>Academic Year (student cohort covered by specification)</b>	2023-24
<b>Module Code</b>	GHM203
<b>Module Title</b>	Research Design and Methods for the Analysis of Global Health Policy
<b>Module Organiser(s)</b>	Virginia Bond
<b>Faculty</b>	<a href="#">Public Health &amp; Policy</a> : London School of Hygiene & Tropical Medicine
<b>FHEQ Level</b>	Level 7
<b>Credit Value</b>	<b>CATS</b> 15 <b>ECTS</b> 7.5
<b>HECoS Code</b>	100962 : 100648 : 101307
<b>Mode of Delivery</b>	Distance Learning
<b>Mode of Study</b>	Directed self-study, through online materials via the Virtual Learning Environment
<b>Language of Study</b>	English
<b>Pre-Requisites</b>	PG Diploma and MSc students taking this module need to have successfully completed at least 3 of the core GHP modules – GHM101, 102, 103 or 104.  None for individual module students, or LSHTM in-house MSc or research degree students wishing to take this module.
<b>Accreditation by Professional Statutory and Regulatory Body</b>	None
<b>Module Cap (Maximum number of students)</b>	None
<b>Target Audience</b>	Elective module for students on DL MSc/PGDip Global Health Policy programme. The module is also available as a stand-alone individual module for anyone with an interest in research design and social science methods for the analysis of global health policy and politics.
<b>Module Description</b>	This module introduces students to key concepts and practices in research design as well as to research methods for the analysis of global health policy and politics.

<b>Duration</b>	Moodle is open to access from 2nd October. Students then plan their own studies between October and June.
<b>Last Revised (e.g. year changes approved)</b>	April 2023

<b>Programme(s)</b> This module is linked to the following programme(s)	<b>Status</b>
PGCert/PGDip/MSc Global Health Policy (Distance Learning - University of London)	Elective

## Module Aim and Intended Learning Outcomes

<b>Overall aim of the module</b>
The overall module aim is to: <ul style="list-style-type: none"> <li>introduce students to the utility and application of diverse methods for the analysis of global health policy providing them with the skills to consider the distinct stages of designing a policy research proposal and/or the application of research in global health programmes.</li> </ul>

<b>Module Intended Learning Outcomes</b>
Upon successful completion of the module a student will be able to: <ol style="list-style-type: none"> <li>demonstrate knowledge of research methods as they pertain to global health policy.;</li> <li>critically evaluate research methods for the analysis of global health policy;</li> <li>appreciate key issues involved in the design and application of these research methods;</li> <li>design their own global health policy research project.</li> </ol>

## Indicative Syllabus

<b>Session Content</b>
The module will cover the following topics: <ul style="list-style-type: none"> <li>Introduction: What is global health policy research?</li> <li>The research process: From research question to research design and methodology;</li> <li>Quantitative and qualitative methods in global health policy research;</li> <li>Reviewing the literature;</li> <li>Case studies and comparative design;</li> <li>Interviews, focus groups and participant observation;</li> <li>Documentary and archival research and analysis;</li> <li>Official statistics and large datasets;</li> <li>Survey research;</li> <li>Health policy analysis;</li> </ul>

### Session Content

- Ethics and values in the research process;
- Qualitative data analysis, common pitfalls, dissemination and policy impact.

## Teaching and Learning

### Notional Learning Hours

Type of Learning Time	Number of Hours	Expressed as Percentage (%)
Directed self-study	72	48
Self-directed learning	28	19
Assessment, review and revision	50	33
<b>Total</b>	<b>150</b>	<b>100</b>

### Teaching and Learning Strategy

Learning is self-directed against a detailed set of learning objectives using the materials provided and engaging with the Moodle activities for each session. Module tutors provide asynchronous support for students by replying to students' contributions to the Moodle activities and to the questions posed in open online discussion forums and facilitating discussion. Students are also strongly encouraged to actively participate in live webinars which are offered multiple times during the year to cover session topics as well as ahead of each of the assignments. Students can use Moodle to obtain tutor support, and to make use of LSHTM online library resources. In addition, written feedback is provided on submitted formative assignments.

## Assessment

### Assessment Strategy

This module will be assessed by two assessed assignments (AAs), respectively contributing AA1:AA2 - 30:70% of final grade. AA1 critically evaluates research methods. AA2 request students to develop the design (including detailed methods) of a research proposal. If students fail the module overall, they are allowed one further attempt at the failed element.

### Summative Assessment

Assessment Type	Assessment Length (i.e. Word Count, Length of presentation in minutes)	Weighting (%)	Intended Module Learning Outcomes Tested
Assessed Assignment	1,500 words	30	1 & 2
Assessed Assignment	3,000 words	70	3 & 4

The assessed assignments for this module can be submitted only once annually. The submission deadline for AA1 is 14 February. The submission deadline for AA2 is 12 May. Both must be submitted via the online Assignment Management System.

### Resitting assessment

Resits will follow the LSHTM Resits Policy, which is published at the start of each academic year. The current policy can be found here: [Resits Policy](#).

## Resources

### Core textbooks

### Other Resources

A full list of essential, recommended and further reading is given for each session.

## Teaching for Disabilities and Learning Differences

The LSHTM Moodle has been made accessible to the widest possible audience, using a VLE that allows for up to 300% zoom, permits navigation via keyboard and use of speech recognition software, and that allows listening through a screen reader.

For students with special needs, reasonable adjustments and support can be arranged – details and how to request support can be found on the [Inclusive Practice/Access Arrangements page](#) of the University of London website.
