

MODULE SPECIFICATION

Academic Year (student cohort covered by specification)	2023-24
Module Code	PHM211
Module Title	Medical Anthropology in Public Health
Module Organiser(s)	Eleanor Hutchinson and Luisa Enria
Contact email	<p>The LSHTM distance learning programmes and modules are run in collaboration with the University of London. Enquiries may be made via their Student Advice Centre.</p> <p>(Enquiries from face-to-face i.e. London-based the LSHTM MSc or research students regarding study of DL modules should be emailed to: distance@lshtm.ac.uk).</p>
Faculty	Public Health & Policy: The London School of Hygiene & Tropical Medicine https://www.lshtm.ac.uk/research/faculties/php
FHEQ Level	Level 7
Credit Value	CATS: 15 ECTS: 7.5
HECoS Code	100437
Mode of Delivery	Distance Learning
Mode of Study	Directed self-study, through online materials (Virtual Learning Environment)
Language of Study	English
Pre-Requisites	None
Accreditation by Professional Statutory and Regulatory Body	None
Module Cap (Maximum number of students)	None
Target Audience	This module is available to students registered for the DL MSc and PGDip in Public Health. It is recommended for students studying the Environment and Health and Health Promotion streams of the Public Health MSc (DL). The module is also open to students on the DL PGDip/MSc Clinical Trials;

	Epidemiology; Global Health Policy and Infectious Diseases programmes. It can also be taken as an individual module.
Module Description	Medical anthropology examines how health and illness are shaped, experienced, and understood both in local contexts and relation to global, political and historical forces.
Duration	Studies for distance learning modules begin in early October. At this time, module materials will be made available on Moodle once fees have been paid. Students are encouraged to commence their studies in October and work steadily through the materials over the course of the academic year and must adhere to other assessment submission deadlines.
Last Revised (e.g. year changes approved)	August 2023

Programme(s)	Status
This module is linked to the following programme(s)	
MSc Public Health: Environment and Health (Distance Learning - University of London Worldwide)	Recommended Elective
MSc Public Health: Health Promotion (Distance Learning - University of London Worldwide)	Recommended Elective
MSc Public Health (General stream) (Distance Learning - University of London Worldwide)	Elective
MSc Public Health: Environment and Health (Distance Learning - University of London Worldwide)	Elective
MSc Public Health: Health Economics (Distance Learning - University of London Worldwide)	Elective
PGDip Public Health (Distance Learning - University of London Worldwide)	Elective
PGDip/MSc Clinical Trials (Distance Learning - University of London Worldwide)	Elective
PGDip/MSc Epidemiology (Distance Learning - University of London Worldwide)	Elective
PGDip/MSc Global Health Policy (Distance Learning - University of London Worldwide)	Elective
PGDip/MSc Infectious Diseases (Distance Learning - University of London Worldwide)	Elective

Module Aim and Intended Learning Outcomes

Overall aim of the module
The overall module aim is to: <ul style="list-style-type: none"> Support students to apply concepts, theories and methods from medical anthropology to public health issues.

Module Intended Learning Outcomes

Upon successful completion of the module a student will be able to:

1. Demonstrate an analytical understanding of a range of concepts, principles and definitions used in medical and social anthropology;
2. Apply these concepts and principles in the analysis of public health issues across different contexts;
3. Evaluate the role of anthropological inquiry and analysis in public health arenas;
4. Critically evaluate, from an anthropological perspective, epidemiological, medical and public health approaches.

Indicative Syllabus

Session Content

- Key methods and theory: participant observation, ethnographic approaches and the history of anthropology;
- Illness and Cross-Cultural Ideas about health, sickness and the body;
- Anthropology and Biomedicine: disease and post-coloniality;
- Anthropology and the Politics of Public Health: biopolitics and governmentality; global medical research.

Teaching and Learning

Notional Learning Hours

Type of Learning Time	Number of Hours	Expressed as Percentage (%)
Directed self-study	110	73.3
Self-directed learning	0	0
Assessment, review and revision	40	26.7
Total	150	100

Teaching and Learning Strategy

Learning is via directed self-study. The course is organised into learning sessions and uses Moodle books to direct learning. Each session has a recorded lecture, a set of readings and an exercise. Discussion forums are provided for each learning session and online webinar discussion sessions. Students are strongly encouraged to participate in the module-specific discussions and online webinar discussion sessions to obtain tutor support, and to make use of the LSHTM on-line library resources. Written feedback is provided on submitted assignments.

This course is focused on reading and analysing texts and students are advised that to complete the course effectively, students need to read intensively over the 10 months. Many of the learning hours are spent reading, making notes from and reflecting on the relevant papers and book chapters. Support is given to students who are not familiar with

Teaching and Learning Strategy

the ways in which to read ethnographic texts (a matrix with a list of questions in which to make notes and a 30-minute video providing details of how to read effectively). In addition, specific reading guides are provided for more difficult texts.

Students may also be directed to listen to the recorded lectures; read specific papers detailed in the reading list. Students are also encouraged to access further online resources in order to expand their knowledge of a topic.

At least two online webinar discussion sessions are anticipated during the year but this depends on student demand. Students will be expected to take part in two online webinar discussion sessions and to make active use of the discussion forums. Discussion and debate are critical to studying this module and students who are not active in these discussions often struggle with the assignment.

There is a key Moodle tutor and other tutors cover specific topics during the course of the year on Moodle.

Assessment

Assessment Strategy

For students registering for the first time in 2022/2023 or 2023/2024

This module is assessed via an assessed assignment (100%) to be submitted no later than May 31st.

For students who first registered for the module prior to 2022/2023

Prior to 2022/23 students were required to complete an assignment (30%) and sit an unseen written examination (70%). If you are a continuing student (i.e. registered for the module for the first time prior to 2022/23) the module will be assessed as follows:

- If you have completed either the assignment or the exam, you will need to complete the remaining element of the summative assessment.
- If you have not completed either the assignment or the exam you may either continue with the assessment strategy in place prior to this academic year (i.e. assignment- 30% and exam - 70%) **OR** complete the assessment strategy in place for students registering for the first time in 2022/23 or 2023/2024 i.e. 100% assignment.

For students registered before 2022/23, who are continuing with the assessment strategy in place when they first registered (i.e. an assignment and exam) the last opportunity to complete either component of the assessment strategy will be the 2023/24 academic year.

Formative assessment. New for 2023/24.

We provide a formative assessment for students to support their learning. The formative assessment does not contribute to student's final grade, but offers an opportunity to receive feedback from the module organisers on their analysis of key anthropological

Assessment Strategy

concepts and ethnographic case studies. This is not obligatory but we strongly advise students to engage with the formative assessment as it has been created to support students to consider concepts and theories in-depth (which will enable them to score highly on the assessed assignment).

Summative Assessment – New for 2022/23 onwards

Note: students who first registered for this module prior to 2022/23 may have the option to continue with the format in place when they first registered for the module. Please read preceding section – ‘Assessment Strategy’

Assessment Type	Assessment Length	Weighting (%)	Intended Module Learning Outcomes Tested
Assessed Assignment	Please see the Assignment Instructions for details.	100	All

For students registering for PHM211 for first time in 2022/23 or 2023/2024

The summative 100% assignment for this module can be submitted only once annually, no later than **31 May** and must be submitted via the online Assignment Management System.

For students who first registered for the PHM211 module prior to 2022/23 (and who are continuing with the assessment format in place when they first registered) The 30% assignment for this module can be submitted only once annually, no later than **31 March** and must be submitted via the online Assignment Management System.

Time-limited assessments for DL modules are held once a year, mostly in June (including resits).

Assessments are held in accordance with University of London's annual guidance but in 2023/24 they are likely to be held online.

Please note that a separate assessment fee may be payable in addition to the module fee. Further details will be communicated as soon as the final decisions are known.

Resitting assessment

Resits will accord with the LSHTM's [Resits Policy](#).

The Resit assessment will be the same assessment type as the first attempt (see previous table).

Resources

The following materials are provided to students after registration and fee payment for this module in October:

- A guide to studying the module;
- A guide for each block in the form of a Moodle book, providing text (and links) to guide the lecture, reading and exercise, also specifying the learning materials;
- A reading list including details of both required and optional readings, which are available either as scans to download, or via the LSHTM's subscription to journals;
- A series of lectures, recorded at the LSHTM;
- A list of useful websites and other online resources.

All materials are provided in e-format and may be accessed via the LSHTM VLE – Moodle.

Teaching for Disabilities and Learning Differences

The module-specific site on Moodle provides students with access to the module learning materials, including a study guide and online reading list (containing both essential and recommended readings), and additional resources including supplementary exercises and optional lecture recordings. All materials posted up on Moodle areas, including computer-based sessions, have been made accessible where possible. The LSHTM Moodle has been made accessible to the widest possible audience, using a VLE that allows for up to 300% zoom, permits navigation via keyboard and use of speech recognition software, and that allows listening through a screen reader. All students have access to "[SensusAccess](#)" software which allows conversion of files into alternative formats.

For students with special needs, reasonable adjustments and support can be arranged – details and how to request support can be found on the University of London Worldwide website at

<https://london.ac.uk/applications/how-it-works/inclusive-practice-access-arrangements>
