

## MODULE SPECIFICATION

<b>Academic Year (student cohort covered by specification)</b>	2023-24
<b>Module Code</b>	1803
<b>Module Title</b>	Sociological Approaches to Health
<b>Module Organiser(s)</b>	Nicki Thorogood and Tim Rhodes
<b>Faculty</b>	Public Health & Policy
<b>FHEQ Level</b>	Level 7
<b>Credit Value</b>	<b>CATS:</b> 15 <b>ECTS:</b> 7.5
<b>HECoS Code</b>	100619
<b>Term of Delivery</b>	Term 2
<b>Mode of Delivery</b>	For 2023-24 this module will be delivered by predominantly face-to-face teaching modes.  Where specific teaching methods (lectures, seminars, discussion groups) are noted in this module specification these will be delivered by predominantly face-to-face sessions. There will be a combination of live and interactive activities (synchronous learning) as well as recorded or self-directed study (asynchronous learning).
<b>Mode of Study</b>	Full-time
<b>Language of Study</b>	English
<b>Pre-Requisites</b>	It is desirable, but not essential, that students have some previous experience of social science, social research or the social aspects of health.
<b>Accreditation by Professional Statutory and Regulatory Body</b>	None
<b>Module Cap (Indicative number of students)</b>	15-25
<b>Target Audience</b>	This module is intended for students on all MScs, particularly those with interests in social and cultural influences on health.
<b>Module Description</b>	This module provides an introduction to sociological perspectives on health, involving the theoretical and empirical study of social and cultural structures and processes that influence health and illness. The module will

	involve applying and critiquing key concepts in sociology as applied to the study of health and illness.
<b>Duration</b>	5 weeks at 2.5 days per week
<b>Timetabling slot</b>	C1
<b>Last Revised (e.g. year changes approved)</b>	

<b>Programme(s)</b>	<b>Status</b>
This module is linked to the following programme(s)	
MSc Public Health	Recommended
MSc Health Policy, Planning & Finance	Recommended
MSc Public Health (Environment & Health)	Recommended
MSc Public Health (Health Services Research)	Recommended
MSc Public Health for Development	Recommended

## Module Aim and Intended Learning Outcomes

<b>Overall aim of the module</b>
<p>The overall module aim is to:</p> <ul style="list-style-type: none"> <li>introduce students to sociological perspectives on health, involving the theoretical and empirical study of social and cultural structures and processes that influence health and illness.</li> </ul>

<b>Module Intended Learning Outcomes</b>
<p>Upon successful completion of the module a student will be able to:</p> <ol style="list-style-type: none"> <li>Demonstrate an understanding of key concepts in sociology as applied to the study of health and illness;</li> <li>Apply these concepts at an empirical level;</li> <li>Demonstrate a critical awareness of the main conceptual, theoretical and methodological issues raised by research in the sociology of health.</li> </ol>

## Indicative Syllabus

### Session Content

The module is expected to cover the following:

- The critical appraisal of how 'knowledge' is produced, including: how 'evidence' is made and used in public health responses introduction to the Concepts of 'decolonising' and 'orientalism'  
Introduction to the concepts of 'decolonising' and 'orientalism'
- The social production of health and ill health: Biomedicine and critiques. How social, cultural and psychological processes shape health and illness experience as well as access to health services.
- Exploring inequalities in health: Tracing how social and material factors, such as social class, ethnicity, gender and disability, shape differential health outcomes.
- Understanding the concept of stigma, particularly in relation to ideas of mental health and illness.
- Medicine, risk and society: Medicalisation and the role of medicine in society. How ideas of risk shape public health responses.
- Engaging critically with the concepts and methods of sociological research in health.

## Teaching and Learning

### Notional Learning Hours

Type of Learning Time	Number of Hours	Expressed as Percentage (%)
Contact time	40	27%
Directed self-study	30	20%
Self-directed learning	30	20%
Assessment, review and revision	50	33%
<b>Total</b>	<b>150</b>	<b>100%</b>

Student contact time refers to the tutor-mediated time allocated to teaching, provision of guidance and feedback to students. This time includes activities that take place in face-to-face (or on-line) contexts such as lectures, seminars, demonstrations, tutorials, supervised laboratory workshops, practical classes, project supervision as well as where tutors are available for one-to-one discussions and interaction by email.

The division of notional learning hours listed above is indicative and is designed to inform students as to the relative split between interactive and self-directed study.

### Teaching and Learning Strategy

Around twenty sessions spread over the duration of the module provide overviews of the material listed above. These are generally lectures by subject area specialists followed by seminars in which students are encouraged to discuss and explore their own views, ideas and responses to the case studies from the topics covered.

There are also documentary films shown to support the topics being discussed. The remainder of the time will be spent in private study. Students will be expected to read and discuss relatively large volumes of material. The private study time must therefore be considered an integral part of the module.

### Assessment

#### Assessment Strategy

The assessment for this module has been designed to measure student learning against the module intended learning outcomes (ILOs) as listed above. Formative assessment methods may be used to measure students' progress. The grade for summative assessment(s) only will go towards the overall award GPA.

The assessment for this module will be online.

Formal assessment is by an individual essay of 1,500 words. One question to be selected from a list of questions based on the lecture/seminar topics.

### Summative Assessment

Assessment Type	Assessment Length (i.e. Word Count, Length of presentation in minutes)	Weighting (%)	Intended Module Learning Outcomes Tested
Coursework	1500	100%	1, 2 and 3

#### Resitting assessment

Resits will accord with the LSHTM's [Resits Policy](#)

## Resources

### Indicative reading list

#### Basic introductions to sociology of health and illness:

Nettleton, S & Gustafsson, U (2002) The sociology of health and illness reader. Cambridge: Polity Press

Gabe, J, Bury, M and Elston, M (eds) (2004) Key concepts in medical sociology. London: Sage

Scambler, G (ed) (2008) Sociology as applied to medicine. London: (6th edition) WB Saunders.

Armstrong, D (2003) An outline of sociology as applied to medicine. (5<sup>th</sup> Edition) Oxford: Arnold

Nettleton, S (2006) The sociology of health and illness. Cambridge: Polity Press.

## Teaching for Disabilities and Learning Differences

The module-specific site on Moodle gives students access to lecture notes and copies of the slides used during the lecture. Where appropriate, lectures are recorded and made available on Moodle. All materials posted on Moodle, including computer-based sessions, have been made accessible where possible.

LSHTM Moodle is accessible to the widest possible audience, regardless of specific needs or disabilities. More detail can be found in the [Moodle Accessibility Statement](#) which can also be found within the footer of the Moodle pages. All students have access to "SensusAccess" software which allows conversion of files into alternative formats.

Student Support Services can arrange learning or assessment adjustments for students where needed. Details and how to request support can be found on the [LSHTM Disability Support pages](#).
