

## MODULE SPECIFICATION

<b>Academic Year (student cohort covered by specification)</b>	2024-25
<b>Module Code</b>	2601
<b>Module Title</b>	Health Policy and System for Sexual and Reproductive Health
<b>Module Organiser(s)</b>	Genevieve Aryeetey, Leonard Baatiema (UG), Kate Reiss
<b>Faculty</b>	EPH
<b>FHEQ Level</b>	Level 7
<b>Credit Value</b>	<b>CATS:</b> 15 <b>ECTS:</b> 7.5
<b>HECoS Code</b>	101317; 100473; 100476; 100648
<b>Term of Delivery</b>	Term 1
<b>Mode of Delivery</b>	Online
<b>Mode of Study</b>	Full-time
<b>Language of Study</b>	English
<b>Pre-Requisites</b>	None
<b>Accreditation by Professional Statutory and Regulatory Body</b>	None
<b>Module Cap (Indicative number of students)</b>	50
<b>Target Audience</b>	This is a core module for students enrolled on the MSc in Sexual and Reproductive Health Policy and Programming. It is intended for students interested in undertaking roles in policy making or programme coordination and who wish to gain a better understanding of health policy and systems issues to inform their professional work in Sexual and Reproductive Health.
<b>Module Description</b>	This module introduces students to key elements of health policy and systems and their relevance to sexual and reproductive health and rights. Students will learn the key features and processes of health policy, including the role and power of different actors and how they influence SRHR policy change in particular contexts. Students will also learn about key features of health systems, how they shape service delivery and the importance of systems “software” factors.

<b>Duration</b>	10 weeks
<b>Timetabling slot</b>	Term 1
<b>Last Revised (e.g. year changes approved)</b>	July 2023

<b>Programme(s)</b>	<b>Status</b>
This module is linked to the following programme(s) <i>(Lead programme first)</i>	<i>(Compulsory/Recommended Option)</i>
MSc Sexual and Reproductive Health Policy and Planning	Compulsory

## Module Aim and Intended Learning Outcomes

<b>Overall aim of the module</b>
<p>The overall module aim is to:</p> <ul style="list-style-type: none"> <li>Equip students to study or work in health policy or health systems arenas with an understanding of the relevance of policy and systems to enhancing sexual and reproductive health and rights (SRHR), at local, national, international levels.</li> </ul>

<b>Module Intended Learning Outcomes</b>
<p>Upon successful completion of the module a student will be able to demonstrate:</p> <ol style="list-style-type: none"> <li>1. Explain what "SRHR policy" is and identify key features of the processes of policy (identification, formulation, agenda setting and implementation).</li> <li>2. Identify the key actors within SRHR policy making contexts, and understand some mechanisms of power and influence over policy change and how these intersect with contextual factors.</li> <li>3. Define the concept of a "health system", and its core objectives, elements and functions and how health systems configurations shape service delivery (particularly with respect to SRH delivery).</li> <li>4. Explain the importance of "systems software", particularly in relation to resilience and readiness for change.</li> <li>5. Critically apply an understanding of the factors that shape policy making and implementation within health systems to identify solutions to SRHR challenges.</li> </ol>

## Indicative Syllabus

## Session Content

The module is expected to cover the following topics:

- Introduction to Health Policy and Systems Research (HPSR) and the differences between policy and systems research/understanding.
- What is SRHR policy?
- Introduction to the Policy Stages model and Policy Analysis Triangle (Walt and Gilson)
- Key actors in SRHR policy and the different forms of power influential to SRHR policy making;
- The political nature of policy making in reproductive health and rights
- Policy-making tools and theories: Agenda setting, stakeholder mapping and analysis tools
- The context of changing global health policy environment relevant for SRH (including UHC, sustainable development, climate change; application of Shiffman theory).
- Implementing policy within a health system (including Application of Lipsky's Street Level Bureaucracy theory).
- What is a health system? Components, functions (governance, financing, WHO's building blocks)
- Contextual influences on health systems functioning (configurations of actors, institutions, global contexts like climate change). "Systems software" and its importance for building resilient health systems.

## Teaching and Learning

### Notional Learning Hours

Type of Learning Time	Number of Hours	Expressed as Percentage (%)
Contact time	26	13
Directed self-study and group work	44	33
Self-directed learning	40	27
Assessment, review and revision	40	27
<b>Total</b>	<b>150</b>	<b>100</b>

## Teaching and Learning Strategy

Teaching will be by recorded lectures, live zoom question and answer (Q&A) sessions, Moodle discussion groups, and online live seminars.

There will be a minimum of 6 recorded lectures; lectures will be linked to 6 specific seminars (in the same week) to discuss topics/issues in detail.

Seminars will consist of directed group presentations by students (e.g. critique/presentation of readings; short presentation on key topic/case studies) to the whole class, and facilitated discussion. There will also be one plenary seminar reviewing the module content and a further seminar session linked to the assessment.

All lectures will be recorded and posted on the online learning platform for offline viewing and/or audio. PDF versions of slides will be posted for all lectures.

4x sets of self-study and self-directed learning will be undertaken against a detailed set of learning objectives using the materials provided, in alternate weeks to the lectures/seminars, picking up on topics presented at those. Module tutors provide asynchronous support for students by replying to students' questions in open online discussion forums and facilitating discussion. Each self-directed session will include a moderated Moodle discussion forum where students can post their questions, concerns and discussion points in their own time.

Indicative Breakdown of Contact Time:

Type of delivery	Total (hours)
Lecture (pre-recorded) and Q&A (live)	6.5
Seminar	8
Moderated discussion fora	11.5 (c. 1 hour each week + 20-25mins extra in weeks 2-9)
Total	26

## Assessment

### Assessment Strategy

The summative assessment for this module is by one written assignment in two parts, focusing on applying concepts to “real world” situations, covering:

Part A: Health Policy

Part B: Health Systems.

The assessment is designed to get students to apply their understanding of the policy development process, the important role that actors play and how that is informed by the context, the content and the overall process. Secondly it will require students to apply systems thinking to an issue related to strengthen the health system to deliver high quality sexual and Reproductive health services.

### Summative Assessment

Assessment Type	Assessment Length (i.e. Word Count, Length of presentation in minutes)	Weighting (%)	Intended Module Learning Outcomes Tested
Coursework (Part A – Health Policy)	1,250 words	100%	1,2 and 5
Coursework (Part B – Health Systems)	1,250 words	100%	3, 4 and 5

### Resitting assessment

Resits will accord with the LSHTM’s [Resits Policy](#)

The resit will consist of a new written assignment on a new topic.

### **Other resources**

A full list of essential, recommended and further reading is given for each session

## **Teaching for Disabilities and Learning Differences**

The module-specific site on Moodle provides students with access to course materials, including any lecture notes and copies of the slides used during lectures (live and pre-recorded). All lectures are recorded and made available on Moodle as quickly as possible. All materials posted up on Moodle areas, including computer-based sessions, have been made accessible where possible.

The LSHTM Moodle has been made accessible to the widest possible audience, using a VLE that allows for up to 300% zoom, permits navigation via keyboard and use of speech recognition software, and that allows listening through a screen reader. All students have access to “SensusAccess” software which allows conversion of files into alternative formats.

For students who require learning or assessment adjustments and support, this can be arranged through the Student Support Services – details and how to request support can be found on the LSHTM Disability Support pages.
