

## MODULE SPECIFICATION

<b>Academic Year (student cohort covered by specification)</b>	2024-25
<b>Module Code</b>	1503
<b>Module Title</b>	Globalisation & Health
<b>Module Organiser(s)</b>	Mishal Khan, Nina van der Mark
<b>Faculty</b>	Public Health & Policy
<b>FHEQ Level</b>	Level 7
<b>Credit Value</b>	<b>CATS:</b> 15 <b>ECTS:</b> 7.5
<b>HECoS Code</b>	100648: 100489
<b>Term of Delivery</b>	Term 2
<b>Mode of Delivery</b>	For 2024-25 this module will be delivered by predominantly face-to-face teaching modes.  Where specific teaching methods (lectures, seminars, discussion groups) are noted in this module specification these will be delivered by predominantly face-to-face sessions. There will be a combination of live and interactive activities (synchronous learning) as well as recorded or self-directed study (asynchronous learning).
<b>Mode of Study</b>	Full-time
<b>Language of Study</b>	English
<b>Pre-Requisites</b>	It is useful for students to have taken Health Policy, Process & Power (1117) in Term 1, or to have a basic understanding of the political economy of health.
<b>Accreditation by Professional Statutory and Regulatory Body</b>	None
<b>Module Cap (Indicative number of students)</b>	40
<b>Target Audience</b>	The module is recommended for students with an interest in global health from the perspective of understanding broad and interrelated determinants of health within and across countries. It is intended for students who want to explore and understand the rapid changes occurring globally and explore their impacts on health at a global and local level
<b>Module Description</b>	The module discusses how linked global changes, known as globalisation, impact on social, economic, environmental and

	political spheres, and the impacts of these on health determinants and health.
<b>Duration</b>	5 weeks at 2.5 days per week
<b>Timetabling slot</b>	D2
<b>Last Revised (e.g. year changes approved)</b>	September 2024
<b>Programme(s)</b> This module is linked to the following programme(s)	<b>Status</b>
MSc Public Health	Recommended
MSc Public Health (Health Promotion)	Recommended
MSc Public Health (Health Services and Management)	Recommended
MSc Public Health (Health Services Research)	Recommended
MSc Health Policy, Planning & Finance	Recommended
MSc Public Health for Development	Recommended
MSc One Health: Ecosystems, Humans and Animals	Recommended

## Module Aim and Intended Learning Outcomes

<b>Overall aim of the module</b>
<p>The overall module aim is to:</p> <ul style="list-style-type: none"> <li>• give students a conceptual and practical understanding of the multiple and complex links between various forms of global change (e.g. environmental, economic, political, technological and social) and human health worldwide.</li> </ul>
<b>Module Intended Learning Outcomes</b>
<p>Upon successful completion of the module a student should be able to:</p> <ol style="list-style-type: none"> <li>1. define key concepts such as global change, globalisation, global health and governance;</li> <li>2. Understand various drivers and forms of global change (e.g. environmental, economic), and their relationship with globalisation processes;</li> <li>3. Assess existing empirical evidence of the links between global change and health, and the methodological tools available to measure such links;</li> <li>4. Cite a range of examples of global health issues in terms of their impacts on human health through case studies (e.g. on environmental change, infectious and non-communicable disease control, multilateral trade agreements);</li> <li>5. Examine the roles of different institutional actors, such as for-profit companies, multilateral organisations (e.g. WHO, World Bank), public private partnerships, and foundations in global health;</li> <li>6. Describe the main challenges for responding effectively to global health challenges through improved global health governance in the form of effective health policies, institutional reforms, and international law and other forms of cooperation.</li> </ol>

## Indicative Syllabus

### Session Content

The module is expected to cover the following topics:

- Key definitions and conceptual frameworks for understanding different types of global change taking place, the key drivers of globalisation, and the main features of shifts between national, regional and global health
- Theoretical and methodological challenges of measuring links between global change and health
- Overviews of forms of global change related to global health in the social, economic, environmental and political spheres
- Examples dealing with familiar public health issues from a global perspective (e.g. infectious and non-infectious disease, pharmaceuticals, tobacco control, alcohol; food; and human rights)
- Debates from policy areas and agendas outside the health sector impacting health at a global level (e.g. trade and trade organisations, security and human rights legislation, major industries of tobacco, alcohol, and pharmaceuticals, and environmental change)
- Review of global health governance structures and forms of global health policies, institutional reforms, and international law and other forms of cooperation

## Teaching and Learning

### Notional Learning Hours

Type of Learning Time	Number of Hours	Expressed as Percentage (%)
Contact time	36	24%
Directed self-study	36	24%
Self-directed learning	20	13%
Assessment, review and revision	58	39%
<b>Total</b>	<b>150</b>	<b>100%</b>

Student contact time refers to the tutor-mediated time allocated to teaching, provision of guidance and feedback to students. This time includes activities that take place in face-to-face contexts such as lectures, seminars, demonstrations, tutorials, supervised laboratory workshops, practical classes, project supervision as well as where tutors are available for one-to-one discussions and interaction by email.

The division of notional learning hours listed above is indicative and is designed to inform students as to the relative split between interactive and self-directed study.

### Teaching and Learning Strategy

Lectures and case study seminars (i.e. class participation, small group work including preparation of a seminar, individual study); critical reading of the literature; private study.

### Assessment

#### Assessment Strategy

The assessment for this module has been designed to measure student learning against the module intended learning outcomes (ILOs) as listed above. Formative assessment methods may be used to measure students' progress. The grade for summative assessment(s) only will go towards the overall award GPA.

The assessment will take the form of a written assignment that brings together the conceptual and empirical content of the module to address a practical policy problem (1500 words).

#### Summative Assessment

Assessment Type	Assessment Length (i.e. Word Count, Length of presentation in minutes)	Weighting (%)	Intended Module Learning Outcomes Tested
Coursework	1500	100%	1-6

#### Resitting assessment

Resits will accord with [Chapter 8a](#) of the LSHTM Academic Manual.

The task will be a written assignment on a related topic.

## Teaching for Disabilities and Learning Differences

The module-specific site on Moodle gives students access to lecture notes and copies of the slides used during the lecture. Where appropriate, lectures are recorded and made available on Moodle. All materials posted on Moodle, including computer-based sessions, have been made accessible where possible.

LSHTM Moodle is accessible to the widest possible audience, regardless of specific needs or disabilities. More detail can be found in the [Moodle Accessibility Statement](#) which can also be found within the footer of the Moodle pages. All students have access to "[SensusAccess](#)" software which allows conversion of files into alternative formats.

Student Support Services can arrange learning or assessment adjustments for students where needed. Details and how to request support can be found on the [LSHTM Disability Support pages](#).
